THURSDAY EVENING, JUNE 10.

KILLING SQURRELS IN CALIFORNIA .- At the Laurel Hill Cemetery recently, the agent for a new squarel, ant and mole exterminator gave a to be found in this market. test of his apparatus. The machine consists of a furnace constructed of galvanized iron, lined with fire clay, about 12 by 24 inches in size. On the inside of this farnace is a discharge pipe, passing from near the top down through the To this furnece is attached an airbottom To this jurnace is attached pump by means of sectional tubes and elastic hose which can be instantly adjusted for op ra-A are sving been made in the furnace. and a pe sencut compound dropped in, the top is securely closed, the chamber placed over the gopher or squirrel hole, and the air-forcing machine started when all the smoke and polson us vapors are forced down into the hole killing, it is claimed, everything animate with

which it comes in contact.

During the experiments at the cemetery sulphur was used; being dropped in the furnace in half-pound peckages. When the apparatus was put in operation over one of these gopher holes the ground for a radius of several yards seemed arimated by a series of mit lature volcances, the sulphuric vapors balching thath from numerous undiscovered holes. About ten minutes' pumpand its connecting drifts with the poisonous fumes, and it is presumed to totally ambiliate its inhabitants.—San Francisco Chronicle.
